Bangalore, Karnataka

mrigz179@gmail.com

ABOUT ME

Frontend-focused React developer with hands-on experience building scalable, interactive web applications. Strong in JavaScript fundamentals, component-driven UI design, and state management. I focus on writing clean, maintainable code, optimizing performance, and building user-friendly interfaces rather than just making features work. Comfortable working independently in agile environments and collaborating with cross-functional teams.

Portfolio - <https://mrigankadas.netlify.app/>

EDUCATION

2022-2024

Presidency College

Master of Computer Application

Pursuing MCA with focus on Data Structures & Algorithms, DBMS, and full-stack development; actively involved in coding contests and secured a win in an inter-college competition.

2019-2022

DHSK College

Bachelor of Computer Application

Completed BCA with coursework in Digital Design, CPU Architecture, Functional & Object-Oriented Programming; contributed to a real-world project as part of the college development team.

PROJECTS

2023 - NOW

MCA final year

ILCT Platform <https://ilct.netlify.app>

Developed an online classroom platform with real-time chat, collaborative coding dashboards, and channel-based learning using React, Material UI, Node.js, and Socket.io, focusing on real-time data flow and responsive UI behavior.

2023 - 2024

Personal Project

Gemini Clone <https://gemini-v3.netlify.app/>

Developed a Gemini-inspired AI chat interface using React, Tailwind CSS, and Framer Motion, featuring OTP-based authentication, conversation management, image uploads, and animated UI transitions. Focused on building reusable components, smooth user interactions, and clean UI architecture.

2023 - 2024

MCA side project

MemNodes <https://github.com/turtlebeasts/memnodes>

Built a social timeline platform using React, Tailwind CSS, Zustand, Node.js, and MySQL, featuring authentication, public/private feeds, and a canvas-based timeline editor. Implemented complex state management for connected timeline nodes, optimized component re-renders, and handled dynamic UI updates for real-time interactions.

SKILLS

- HTML
- CSS
- JavaScript
- React
- TailwindCSS
- NodeJS
- Zustand
- Git/Github
