ABOUT ME

I'm a detail-oriented developer who enjoys building practical, user-focused web applications. I work mainly with HTML, CSS, JavaScript, React, PHP and MySQL, and I care a lot about writing clean, maintainable code rather than just making things work. I'm always trying to understand why something is done a certain way instead of blindly following tutorials. Right now, my goal is to contribute to a team where I can keep improving my skills while delivering real product value.

EDUCATION

2022-2024
Presidency College

Master of Computer Application

Pursuing MCA with focus on Data Structures & Algorithms, DBMS, and full-stack development; actively involved in coding contests and secured a win in an inter-college competition.

2019-2022
DHSK College

Bachelor of Computer Application

Completed BCA with coursework in Digital Design, CPU Architecture, Functional & Object-Oriented Programming; contributed to a real-world project as part of the college development team.

PROJECTS

2023 - NOW
MCA final year

ILCT Platform

Developed an online classroom platform with real-time chat, collaborative coding dashboard, jamboard sessions, and channel-based learning using React, Material UI, Node.js and Socket.io.

2023 - 2024
Personal Project

Gemini Clone

Developed a Gemini-inspired AI chat UI with OTP login, conversation dashboard, simulated AI responses, image uploads, and Framer Motion animations using React + Tailwind.

2023 - 2024
MCA side project

MemNodes

Built a social timeline platform with login/signup, public feed, sharing, and a visual canvas-based timeline editor for connecting events, using React, Tailwind, Node.js, Express, MySQL and Zustand.

SKILLS

- HTML
- CSS
- JavaScript
- React
- TailwindCSS
- NodeJS
- Problem Solving
- Git/Github
